📄 SUMMARY

Software & Game Development student with a strong foundation in software engineering, optimization, and systems development. Proficient in C++, with practical experience in C#, Java, and knowledge of Python and JavaScript. Experienced in games and game engine development, external library integration, and collaborative work on cross-platform projects (PC, Android, and consoles). Skilled in Unity, Unreal Engine (including plugin publishing), and tools such as Visual Studio and Android Studio. Strong interest in applied AI, process automation, and improving development efficiency.

📁 PROJECTS

Cosmic Architect

Unreal Engine Plugin - Fab Marketplace
09/2025 – 06/2026

Lead the development and implementation of the project, building a C++/Blueprints user-friendly tool that alouds the creation of custom procedural planetary systems. The plugin was published in Fab after passing their technical and legal requirements.

String Typing

ComJamOn2026 (Powered by EA) - 1st Place Overall
02/2026

Collaborated in a multidisciplinary team of two developers and one artist to participate in a faculty-organized game jam judged by industry professionals from Electronic Arts (EA). Developed and delivered a complete game under strict time constraints, achieving 1st place overall.

H-Engine

C++ 3D Game Engine
01/2025 – 06/2025

Worked as part of a 10-member team to design and develop a custom 3D game engine in C++. The project integrated multiple external libraries, including rendering, input handling, audio, and physics systems. To test its capabilities, two minigames where built using the engine.

🎓 EDUCATION

Bachelor's Degree in Game Development

Universidad Complutense de Madrid 🔗

09/2022 – 2027 | Madrid

Finishing early next year.

- 9,5 at the End Degree Project

🎒 OBJECTIVE

My main objective is to begin my professional career and in the process to expand my knowledge about frameworks, software development and automatization.

🧠 SKILLS

- Teamwork and collaboration
- Development with Unreal Engine and Unity
- Mobile apps development
- Cross-platform development
- Simulation development
- Adaptability to frameworks
- Problem Solving
- Research
- Code optimization
- Applied AI
- Version control
